**The Ultimate Closet** combines function with design to create a highly organized, eye appealing experience. When choosing closet lighting, The Ultimate offers long life, highoutput Piranha leds, in both true white and warm white color renditions. This along with two aiming options, allows the lighting to be directed straight down or angled to the front of the clothing. Other features include a functional built in UV light which will keep your clothing and closet germ free, induction power options to allow power supplies to be remotod without heavy wiring requirements, an attractive prismatic acrylic lens to avoid glare and points of light, custom lengths, heavy duty aluminum 1 3/8"od rod, and a variety of metal finishes. Specify The Ultimate Today.
